Background

Syndicom was founded to enable communities and companies to seamlessly collaborate and share knowledge, ultimately delivering innovative solutions to market in a more timely, creative and efficient way.

In October 2005, the company launched its flagship product, the Syndicom SpineConnect platform, to enable spine surgeons to collaborate on difficult and unusual cases. In 2006 Syndicom delivered two new products built on its widely embraced SpineConnect platform, ProductEdge and ResearchEdge Private Networks, and in 2007 launched TrialEdge and Technology Fellowships.

Syndicom Products

Syndicom’s collaborative process is built on over 30 years of research by professors Raymond Miles (University of California, Berkeley), Charles Snow (Pennsylvania State University), and Grant Miles (University of North Texas).

The Syndicom SpineConnect platform enables surgeons to collaborate on difficult and unusual cases, develop novel approaches to treatment, address the top challenges in spine healthcare, and create technological solutions that address voids in the current product market.

With the launch of ProductEdge, ResearchEdge, TrialEdge, and Technology Fellowships, Syndicom expands its family of products to enable surgeons, industry, and associations to take advantage of SpineConnect’s proven collaboration network to accelerate research, education, clinical trials, and the adoption of new technologies and products.

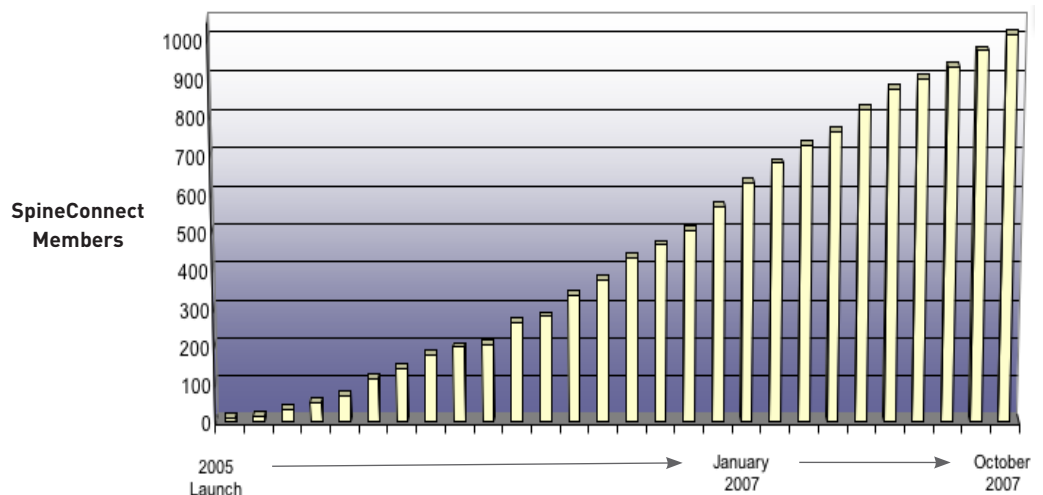

| Products | Purpose | Audience |
|-----------------------|------------------------------|-------------------|
| SpineConnect Platform | Case collaboration | Surgeons |
| ResearchEdge PN | Case-based research | Surgeons/Industry |
| ProductEdge PN | Product training and support | Industry |
| TrialEdge PN | Clinical Trials | Industry |
| Technology Fellowship | Focused training and support | Industry |

Syndicom SpineConnect Community

Everyday, our members are logging on to collaborate on cases, educate themselves, and make connections with their colleagues. Syndicom’s SpineConnect community has:

- Over **1000** members
- Over **30** different countries represented
- **100+** groups formed
- **800+** cases and **3800+** reviews posted
- **200,000+** visits
